## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments filed 4/23/2004 have been fully considered but they are not persuasive.

Applicant argues that the measurement line of Deinlein is not a coolant line.

Review of applicant's reveals the feature which applicant is arguing (i.e., measurement line being a coolant line) is not set forth in the claim language. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant additionally argues that the measurement line of Deinlein does not branch off from the pressure line downstream of the HP pumps.

Attention is drawn to column 4, lines 43+ of Deinlein wherein the hydrogen content present after or downstream [emphasis added] of the pumps is being determined continuously, processed by controller (76) as indicated by lines (78).

Accordingly the rejections of Paper no. 8 are herein incorporated by reference.

### *Conclusion*

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
